4000 Series

4000 Series Complete Air Filtration, More Compact Design

The 4000 series features a selection of compact air purifiers, ideal for environments where space (height) is minimal, or the user prefers a lighter, more portable machine.

With up to 18 pounds of activated carbon for chemical adsorption and a HEPA filtration system for airborne particles, the 4000 series is the perfect choice for smaller rooms (max 1,200 square feet) with a less severe level of air contamination.

1 Customizable Features

a Activated Carbon Blend

Exec Blend: Our Exec carbon is our general-purpose blend, ideal for trapping a wide range of airborne chemicals, gases and odors.

Vocarb Blend: Our Vocarb carbon is our boosted blend, offering a more aggressive removal of hard-to-trap airborne chemicals, gases and odors. This blend is best suited for newly renovated environments, unknown contaminants and/or formaldehyde.

Custom Blend: Have an unusual IAQ problem? Let us customize the perfect carbon blend solution!

b Filter Depth

A unit's filter depth is key to its adsorption capacity. Customize your unit with a 2.5" (regular), 3" (deep or "D") or 3.5" (extra deep or "DX") carbon bed filter to maximize its chemical-adsorption efficiency.

2 Optional Features

a Virus, Mold & Bacteria Protection

Customize your air purifier with a UV light to provide additional protection from viruses, mold and bacteria. Add a photocatalytic reactor to your UV option for the most advanced protection!

b Available Colors
