

**Soldering / Nail Salons**

**Soldering / Nail Salons**

## Model 5000 W-VOCARB

**Soldering / Nail Salons.** Air purification systems

***Filter Airborne Chemicals, Vapors  
Gases, Odors as well as Smoke.***

**For stationary applications where it is important to capture and retain airborne chemicals, vapors, odors and smoke from soldering work stations.**

### **Filtration**

#### **5 stages filtration:**

- Pre-filter to capture large particles of dust.
- 99% Particulate, HEPA Filter, to capture respirable size particles, as small as 0.3 microns from smoke and dust.
- Large main carbon filters that holds 18 lbs. of special carbon for adsorbing chemical / soldering fumes which can make you very ill.

### **Robust all-metal housing**

- 15" Diameter x 21.5" H.
- Steel housing.

### **Convenient to move**

- Heavy duty easy glide casters.
- Weighs 45 lbs.

### **Flexibility**

- By utilizing 1 standard 5" x 6' kanaduct interlock flex hose, the unit can be located close to the work area in the best position to capture the fumes.
- Air volume draw calculated to capture the fumes
- Simply plug into 115 V. / 60 Hz/1 ph and your chemical fume collector will give relief to the operator.

### **Powerful, low consumption motor**

- 400 CFM Free Flow.
- 1 amp.

### **Option**

- Also available:  
5000 W-D with 22 lbs. of carbon

**AllerAir™**  
Model 5000 W-VOCARB

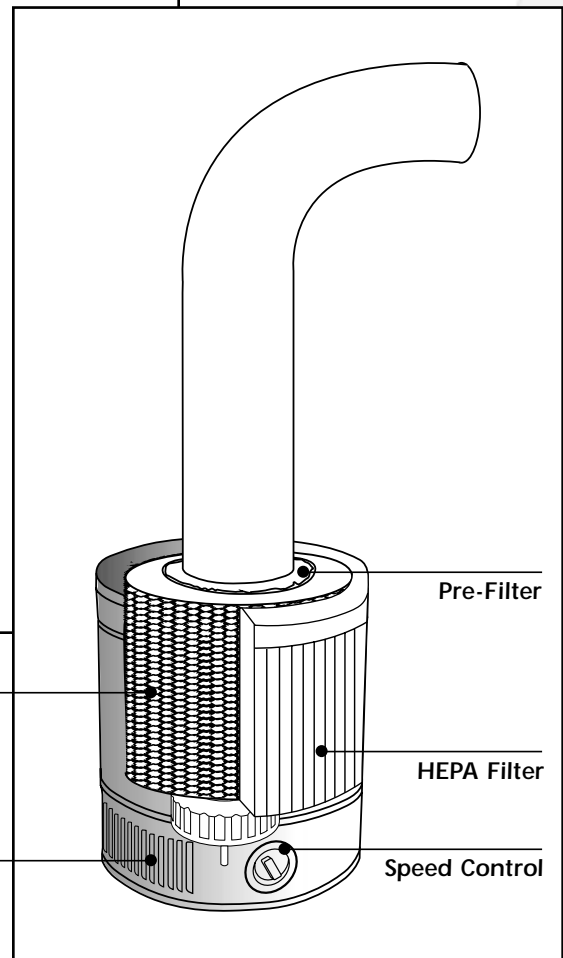

**Reduce Gases, Odors and Smoke in the air you breathe**
